

## Information Sheet

TEES VALLEY

### Eye Project - At your school

This will involve the class spending sometime recording the habitats and species of animals, birds and plants that can be found in your school grounds.

This is followed by the pupils inputting the information onto a map based system through the internet.

#### Curriculum Links

- Observations of plants and animals and recognition of different environments
- Using keys to identify animals
- Inputting information onto a database

**At the end of the Session children will have..**

- Used a key to identify plants and animals.
- Learnt about different habitats.
- Used the internet to input scientific information into a data base

#### What happens in the session

This will involve the class spending sometime recording the habitats and species of animals, birds and plants that can be found in your school grounds (or a local greenspace).

This is followed by the pupils inputting the information onto a map based system through the internet.
